SUMMARY

Full-Stack Web Developer with over 4.5 years of experience building web applications end-to-end, leveraging Claude Code as a daily tool to accelerate development and ship higher-quality work faster.

Proven track record of leading projects holistically - from product concept through UX, frontend, backend, and integrations - while collaborating closely with cross-functional teams including product, design, marketing, and executive leadership.

Strong product mindset combined with a proactive, ownership-driven approach to shipping features that matter. Recognized for translating user feedback into product decisions, driving initiative across the stack, and enhancing user experience through thoughtful design and engineering.

CONFERENCES

Cashifam Katowice ↗

11/2025

Katowice

Talked about user experience design and why most product teams overlook this critical aspect when building digital products. Shared practical insights from my work at Cookie3 on how to identify common UX pitfalls and build interfaces that genuinely serve users.

Superteam Solana Meetup: Katowice ↗

07/2025

Katowice

Spoke about the real challenges faced by junior developers entering IT and Web3, questioning whether these barriers are as significant as commonly portrayed. Shared my own experience from Cookie3 on navigating early-career obstacles and finding real opportunities in the Solana ecosystem.

EXPERIENCE

Fullstack Developer · Product Engineer

07/2024 - Present

Cookie3 ↗

- Developed and led flagship apps across Cookie3's product suite - Cookie AI Agents Index, Cookie Snaps, Cookie Pro Deep Research AI Chat, Cookie3 Analytics App, and Cookie Community Staking App - owning frontend, backend, and UX end-to-end.
- Designed and shipped an AI chat agent powered by Claude API (tool use, context management, multi-step workflows), letting users query complex analytics conversationally.
- Architected scalable systems serving hundreds of thousands of users, including interactive dashboards with advanced integrations to external APIs and on-chain data sources.
- Partnered with department heads across product, design, and marketing to turn strategic ideas into shipped features and improved UX flows.

Fullstack Crypto Developer

06/2023 - 07/2024

Hashup ↗

- Developed various Web3 applications with smart contract integrations and built scalable backend services supporting end-to-end product delivery.
- Worked directly with international clients, owning features from requirements through production deployment.

Fullstack Developer

02/2022 - 07/2023

codixe.co

- Developed e-commerce stores for international clients, including shops managing catalogs of several thousand products.
- Delivered Headless Shopify solutions from frontend through backend and integrations with external systems.

Frontend Developer

10/2021 - 01/2022

Strona Agency

- Developed simple Next.js websites integrated with headless CMS solutions for agency clients.
- Built multi-language pages with localization support tailored to client requirements.

TOP PROJECTS

Product Engineer

Cookie Pro

Built cookie.pro, a professional index covering crypto project sectors with advanced dashboard metrics, KOL exports, watchlists, powerful metasearch, and the flagship feature - an AI chat that renders rich responses inline with charts, tables, and structured data, built for serious analysts, traders, and research teams.

Owned frontend and backend across the platform, including the agent backend powering the chat. Worked on the system prompt design, agent logic, and the full backend architecture connecting the chat to the platform's underlying data.

Fullstack Developer

cookie.fun

Built cookie.fun, the leading index and attention layer for crypto projects, where Snaps quantify mindshare by rewarding users for tweeting about projects - turning social attention into a measurable ranking signal traders and teams rely on.

Owned frontend and backend with an obsessive focus on UX, and the app held up under heavy user traffic at peak, making cookie.fun the go-to reference for crypto project discovery. Integrated on-chain wallet connections and built infrastructure to handle high-load scenarios.

Fullstack Developer

Cookie3 Affiliate

Built the platform end-to-end as the sole frontend engineer and core backend contributor. On the frontend, shipped campaign creation flows, KOL discovery dashboards, and wallet-attribution analytics in React/Next.js with TailwindCSS. On the backend, built the full referral system and all third-party integrations, including social platforms (Twitter/X) for KOL verification and linking social activity to onchain conversions.
